To: Duncan Hughes; Julio Fuentes
Date: Thu, Sep 20, 2007 6:00 PM
Subject: Re: Soledad Mountain Road

Duncan:

I went to the site today and the current speed is 35 mph. Therefore, we would like it to be reduced to 25 mph. I've seen a school on one of the side streets also. Our issues are on the 5700 block of the road.

Thanks, jamal

=====
I'll say around 30 mph

=====
=====

>>> Duncan Hughes 9/19/2007 1:40 PM >>>
Same question: What is a safe speed?

Thanks,

Duncan

>>> Jamal Batta 09/19/07 1:29 PM >>>
Duncan:

Closing the road is not an option at this time. We need traffic to move slower near the 5700 block of Soledad Mountain Road. This is the most critical area on the road.

Thanks, jamal

=
=====

>>> Duncan Hughes 9/19/2007 1:23 PM >>>
So, in your engineering judgement, based on the dangerous condition, what would be a safe speed? And, would closing the road not be safer?

>>> Jamal Batta 09/19/07 11:19 AM >>>
Yes.

=====
=====

>>> Duncan Hughes 9/19/2007 9:17:17 AM >>>
Hi Jamal

Is this considered an immediately dangerous condition?

Duncan

>>> Julio Fuentes 09/19/07 9:08 AM >>>
ok, Duncan will follow up, Julio

Here are my suggested edits. Please note in the opening sentence, were the breaks caused by soil movement?

Also, we need to brief District 1 before this letter goes out.

R

>>> Rob Hawk 9/18/2007 8:56 PM >>>

Attached is the draft text of the letter to the homeowners after Mark's review. Once we insert the date for the highlining, the letter can be addressed and sent out, hopefully Wednesday.

Mark: I took out all of the editing information, and given my skill level, you may want to peruse it briefly to make sure I didn't inadvertently change anything.

>>> Afshin Oskoui 09/18/07 4:27 PM >>>

Rob, yes let's send it to Mark for final review, and include the whole group as a cc so they also see the final draft version at the same time. Also, include Jaymie Bradford as part of your distribution. We should try to send the letter out by tomorrow, and coordinate w/ Stan/Jim to pick the date for the highlining as soon as possible. I'll be out of town the next three days, Hossein will cover for me while I am gone. Once the letter is ready to go out Hossein should coordinate w/ Jaymie to provide notification to CD 1 as the letters go out.

Also, as discussed we should provide Carol w/ some general speaking points about the situation in anticipation of the calls which may come in. Thanks, Afshin

Dear Soledad Mountain Road Homeowner:

As you are aware, there have been a series of water leaks on service connections from our main water line on your street **caused by soil movement????**. This resulted in unscheduled repair to water services, and traffic disruption due to repair activities. The purpose of this letter is to inform you that the City of San Diego will be installing above ground piping ("highline") to provide water service to your property beginning on September ??, 2007. At that time, the Water Department will isolate and depressurize (turn-off) the existing underground water main. In addition, City forces will be conducting a soil investigation in the area to determine the cause of the recent leaks. While most of this work will take place in the street and sidewalk, there will be some unavoidable inconvenience to local residents as equipment and personnel take up parking.

The purpose of this effort is to minimize potential for damage to the water main and roadway from possible soil movement in the 5700 block of Soledad Mountain Road. Until the cause of the leaks has been identified and corrected, the City will utilize the highline to provide **safe and** reliable water service for your property and other properties that depend upon the subject water main.

We appreciate your patience and cooperation during our activities in the area to protect the utilities, and investigate and identify the cause of the problem. During this time, please contact Carol Drummond at our hotline (619) 533-3872 if you have any questions. If you notice any service leaks, please immediately call our utility hotline at (619) 515-3525.

Subject: Re: Soledad Mountain Road water line/letter to customers

yes, we can. Simply wanted to avoid an additional written homeowner letter, if not needed. The text that I would have included in this letter was... "During this on-site investigation, City forces may request from you temporary access to your private property in order to televise the sewer lateral leading from your house to the city's sewer main."

thanks, Chris

>>> Rob Hawk 9/19/2007 7:37 AM >>>

Chris: can we do that separately? We need to get this out today because the highline is a priority (laterals leak much slower). We can send that to the ones we identify as at risk. This letter is more for the entire neighborhood. If you send me a draft, I'll start it through the process with the CA & mgt. Rob

>>> Christopher Toth 9/19/07 7:00:14 AM >>>

Rob, I would like to include a sentence or two indicating that city forces also may be interested in televising certain property owners' sewer laterals as well. Can we include verbiage to that effect in this letter? Chris

>>> Rob Hawk 9/18/2007 8:56 PM >>>

Date: 9/19/2007 11:36:23 AM
Subject: Re: HI Line on Mt Soledad

Stan:

Is this the earliest you can do the hi-line. Can you do it earlier? It is critical that we do it ASAP.

Please let me know before 2 p.m. today, if you are willing to change the date of the hi-line from 9/27/07 to an earlier date.

I want to get the letter out this afternoon.

Thanks, jamal

===

=====

Stan Medina 9/19/2007 8:31:24 AM >>>

Alex,

Today we are beginning the process to install an additional fire hydrant on Caminito Avola, to provide adequate fire protection. It's a two day process, by tomorrow afternoon it should be activated. I will contact the SDFD and inform them, (I'm certain they will be pleased).

After meeting with Jesse and Bernard, we have scheduled the initial hiline process for Soledad Mt. Rd. to begin next Thursday, September 27th. We will hiline first, and then cut & plug the 12"AC water main. I will contact the SDFD and discuss fire hydrants and fire protection.

Also, is there a reason we are being requested to put the fire hydrant in the alley east of Soledad Mt. Rd. out of service?

Thanks

Stan Medina

Until the cause of the leaks has been identified and corrected, the City will utilize the highline to provide water service for your property and other properties that depend upon the subject water main.

We appreciate your patience and cooperation during our activities in the area to protect the utilities, and investigate and identify the cause of the problem. During this time, please contact Carol Drummond at (619) 533-3872 if you have any questions. If you notice any service leaks, please immediately call our utility hotline at (619) 515-3525.

Sincerely,

Janet Behr

THE CITY OF SAN DIEGO

September 19, 2007

Dear Soledad Mountain Road Homeowner:

As you are aware, there have been a series of water leaks on service connections from our main water line on your street. This resulted in unscheduled repair to water services, and traffic disruption due to repair activities. The purpose of this letter is to inform you that the City of San Diego will be installing above ground piping ("highline") to provide water service to your property beginning on September 20, 2007. At that time, the Water Department will isolate and depressurize (turn-off) the existing underground water main. In addition, the City will be hiring a geotechnical consultant to conduct a soil investigation in the area to determine the cause of the recent leaks. While most of this work will take place in the street and sidewalk, there will be some unavoidable inconvenience to local residents as equipment and personnel take up parking.

The purpose of this effort is to minimize potential for damage to the water main and roadway from possible soil movement in the 5700 block of Soledad Mountain Road. Until the cause of the leaks has been identified and corrected, the City will utilize the highline to provide water service for your property and other properties that depend upon the subject water main.

We appreciate your patience and cooperation during our activities in the area to protect the utilities, and investigate and identify the cause of the problem. During this time, please contact Carol Drummond at (619) 533-3872 if you have any questions. If you notice any service leaks, please immediately call our utility hotline at (619) 515-3525.

Sincerely,

James Bahr

Subject: Fwd: Re: Urgent Help needed -Sole Source Consultant Agreement

Hasan,

It goes without saying keep the information flowing on our work. Consider any request on Mt Soledad like a constituent calling in an Emergency Pothole repair, immediate response.

Who is issuing the task order for the crack seal (Ed Celaya?).

John:

We have contacted Street Division to seal the cracks and two point/location repairs. We already sent the location to Streets. also we can meet staff on site to coordinate. It is critical that we do these before the rain forecasted for this weekend.

Please let me know if you need any questions.

Thanks, jamal

Afshin,

My understanding is that there isn't any immediate Street Division actions but we will provide support as needed. If the Street needs crack sealing, trench repair due to potholing, or other repairs due to the distress.

Hasan Yousef (OCA Deputy Director) will be the initial point of contact until the specific field assignment is defined. Hasan and I will discuss today who will handle the field operations (if you have any items). It may either be our Roadway section or Trench Repair team.

Tammy,

Just a heads up that we'll need your help to approve and process a sole source consultant agreement for a Geotechnical Consultant services for the Soledad Mtn Road. The road and associate underlaying soil is showing signs of distress and possible movement, and we want to investigate it immediately as a health and safety issue. We are contacting some consultants to see who will accept the scope of work and will process an agreement post haste. We'll follow up w/ the necessary paper work as soon as we've identified the consultant who will perform the work. Your help is much appreciated. Please let me know if you have any questions. Thanks,
Afshin

Gene;

Please note this correction to the crackseal limits.

Corona Ct is off of Soledad Rd not Soledad Mountain Road. **The crackseal limit is on Soledad Mountain Road from 5735-5685 Soledad Mountain Road.**

thanks;

Michael

>>> Gene Matter 9/19/2007 1:38 PM >>>

Here's the latest update on the work needed (as per Michael Handel);

Soledad Mtn Road - crackseal from Corona Ct to 5747 Soledad Mtn Rd (600'). City crews will place no parking signs on 9/19. Roadworks Inc will crackseal on 9/20.

Soledad Mtn Road - approximately 400 sq ft patch needed at 5725. Crews will be dispatched on 9/20.

5734 DeserView Dr - approximately a 400 sq ft remove and replace area of "heaved" pavement. Crews will be dispatched on 9/20. Underground Service Alert has not been called. The area will be marked and called on 9/19 pm.

Rob Hawk, City of San Diego Engineering Department, I am sending to you my email address per your phone request.

You have requested SDG&E to review electric and gas facilities in the vicinity of 5695 to 5725 Soledad Mountain Road due to observed land movement.

You described that the overhead electric lines are tight with no slack or catenary and that SDG&E has recently repaired service line gas leak(s).

You also described that the City of San Diego is in the process of highlining a water main to avoid breakage due to anticipated earth movement and that you are having a Geotechnical Report prepared to assess this area.

Cindy and Gordon, I am available from 6:30 AM to 3:00PM Thursday to meet you onsite to determine a course of action for the gas piping. Gordon, please notify the appropriate SDG&E personnel for the electric.

Thank you.

From: Rob Hawk
To: Boyle, Neil; Cecil, Cindy; Curry, Monica; Givianrad, M. R.; Jol, Peter J.; Serrano, Mark A. [SDGE]; Truong, Can; Zepeda, Pete
Date: September 20, 2007 9:22:28 AM
Subject: RE: 5695-5725 Soledad Mountain Road

Monica: see the attached photograph. The two lines directly above the blue suburban are parallel, and attached to the same poles, and should be roughly parallel. The upper line has laterals that cross the street. Note how that line is pulled approximately 1 foot to the right, toward the uphill side of Soledad Mountain Road (West). That condition would be consistent with the estimated 3-4 inches of horizontal widening we observe in the pavement that would be reflected in the lateral line tension. However, we are not experts in your field, so if your staff do not feel that the lines are at risk, then we accept your assessment.

Kindest Regards,

Rob Hawk

Beach Cities Troubleshooter reported SDG&E's OH line, 12kV circuit 59 out of Rose Canyon Substation is safe. The poles are stable, the slack is normal, the pole line is not in distress.

Gas crews have been following up on the gas leaks and the gas Supervisor is aware of the situation up there.

Please don't hesitate to call me at any time should there be any concerns about the electric distribution system in this area. And of course, if anyone suspects an immediate threat, they should call 411-SDGE to report their concern to have a troubleshooter dispatched to evaluate the scene.

Thank you Rob for expressing your concern and sending the picture. A construction foreman also went out to assess our pole line and reports:

"Our poles are not in any danger. The ground is firm around the poles, and there are no gaps in between the poles and ground. The lines in the picture that are pulled out of line are communication(telco & ctv). However, it appears those are out of line, simply because of the length, and the street is so wide."

Again, please contact SDG&E at anytime should conditions change and you suspect any problems. Thanks,
